FY 2023

Revenue increase driven by growth in service revenues.

Total **Costs and Expenses** – operationally higher; driven by the increased electricity, workforce costs as well as product-related costs.

Positive one-offs of EUR 34 mn (thereof pos. EUR 39 mn in workforce costs) and negative FX effects offset each other in FY 2023.

Operating result improved, driven by operational performance despite higher D&A coming from RoA associated with lease agreements with ETS.

Financial result in yoy comparison primarily impacted by higher interest expense on leases and financial liabilities.

Net result operationally slightly above PY level.

Free cash flow (excl. spectrum)	106	101	4,3%	487	613	-20,6%

Free Cash Flow was lower vs FY 2022, due to payments for spectrum fee, higher lease payments as well as higher income taxes paid.

Spectrum payments amounted to EUR -132.9 mn in 2023 (2022: EUR -9.5 mn)

Working capital changes had a negative impact of EUR 14 mn in 2023 (2022: positive EUR 91 mn) as reduced accounts payable, increased installment sales and an accrual release could only be partly mitigated by positive timing effects from accounts receivable.

Focus topic Q4 2023: Continued investments in fiber and 5G network expansion in Austria

Current status

Fiber roll-out on track

- 73,000 km fiber network in Austria
- EUR 234 mn subsidies granted from BBA 2030

FTTH utilization

Fiber

FTTH utilization and deregulation

- VULA & VHCN partnerships
- Contracts w/ > 50 partners

Leading 5G position in Austria

~85% 5G pop coverage

Way forward

FTTH:

 Scale up in the build-out phase, perform optimization in the last mile

5G:

 Network equipment upgrade and low-band modernization to enhance readiness

A'

Jowers spin-off

A1 successfully spun-off tower business in Q3 2023

On September 22, 2023, the former tower business of Telekom Austria AG (Towers business) was listed on the Vienna Stock Exchange under the newly established EuroTeleSites AG.

Rationale:

Focus on core telecoms business | Efficient budget allocation | Reduction of financial debt | Higher multiples

Financial Impacts:

- Balance Sheet: +7%, mainly due to higher lease liabilities and right-of-use-assets
- P&L*: revenues (-0.1%), EBITDA (~+1%), EBIT (-7% due to higher D&A), net result (-14% due to lower interest expense on financing but higher interest related to rights of use and lower income tax)
- CAPEX lower by mid double digit € mn
- Free cash flow: lower by $\sim \in 60$ mn per year (on average)
- Financial debt: Reduced by $\in 1$ bn

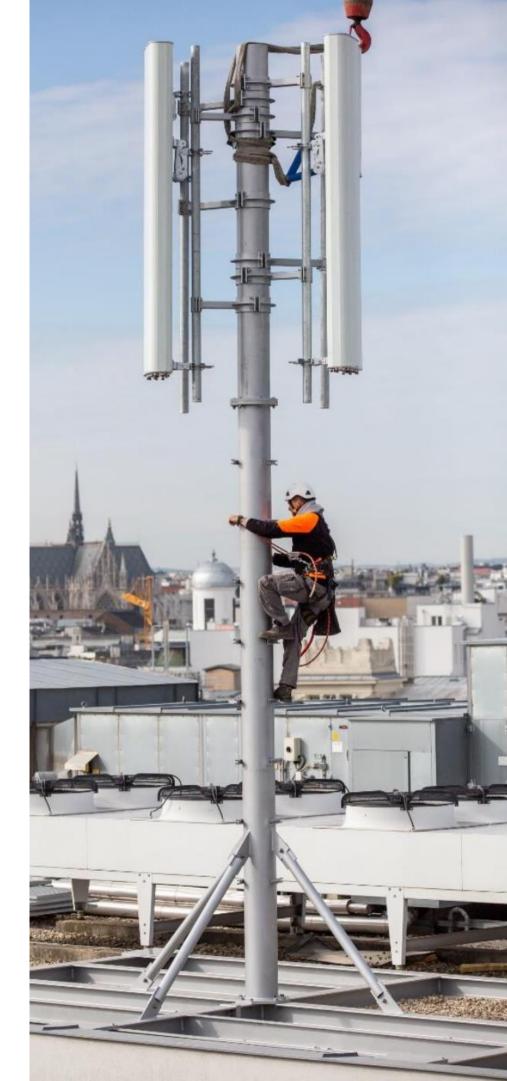

A1 Group secured long-term access

Indefinite contract duration with termination possible | Inflation protection in place | A1 is free to choose tower providers

Low operational impact | No impact on A1 Group's dividend policy | € 1 bn debt reduction for A1

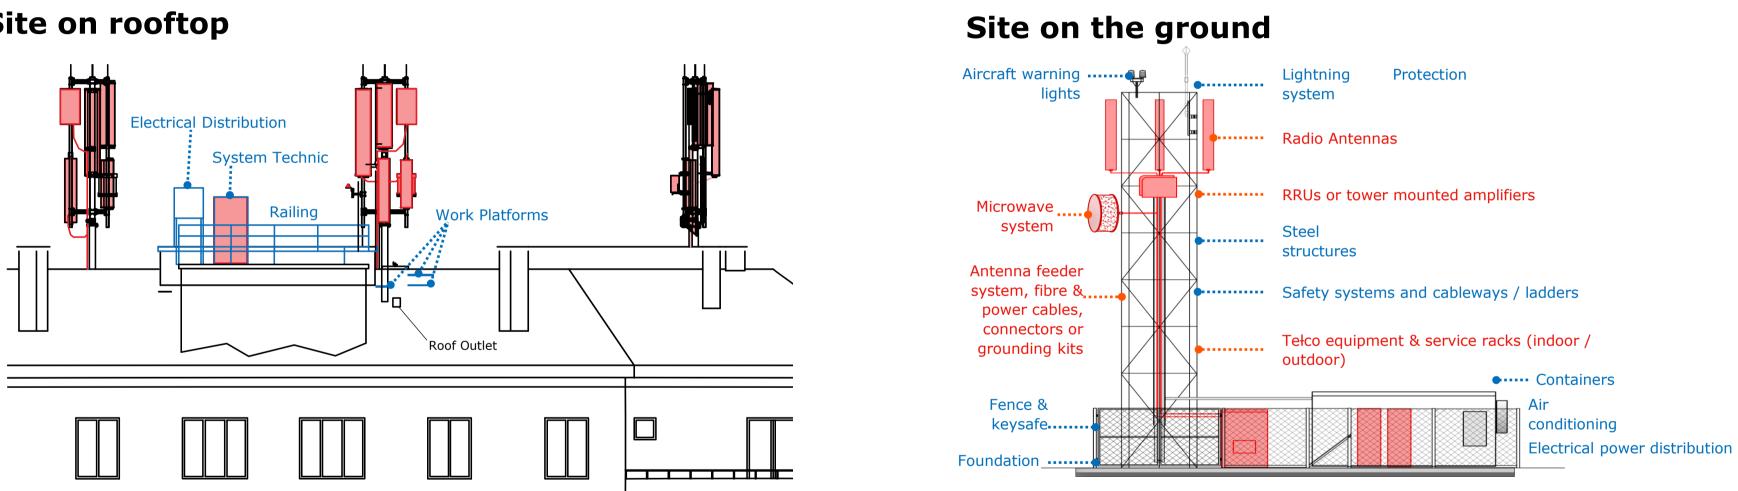

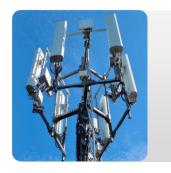

What was included in the Transaction

Passive Infrastructure > Transferred to EuroTeleSites

Active Infrastructure > Retained by A1

Site on rooftop

- Simple constructions without technological advantage for telcos.
- Tower business comprises passive elements vs. active components that remain with A1. •
- Added value is only created by installing the transmission and technology equipment. •
